Contents of Vol. 144

Part 1

JEAN-PIERRE BRETAUDIERE and JOACHIM FRANK. Reconstitution of molecule images analysed by correspondence analysis: a tool for structural interpretation 1

SUBHASH CHANDRA, GEORGE H. MORRISON and CHRISTINE C. WOLCOTT. Imaging intracellular elemental distribution and ion fluxes in cultured cells using ion microscopy: a freeze-fracture methodology 15

ALEX G. SMITH. Astronomical hypersensitization techniques applied to photomicrography: Kodak Technical Pan Film 2415 39

M. L. MOLERO, P. DEL CASTILLO and J. C. STOCKERT. Fluorescence reactions of orcein: new applications for an old stain 45

E. B. JENSEN and R. SUNDBERG. Generalized associated point methods for sampling planar objects 55

EMMANUEL K. ATTIOGBE and DAVID DARWIN. Correction of window size distortion of crack distributions on plane sections 71

DIMITER V. MARKOV. Quantitative electron microscope autoradiography: application of multiple linear regression analysis 83

Book Review 105

Rapid Publications

OLIVER C. WELLS and CATHERINE A. STOYE. Relationship between type-1 magnetic contrast in the scanning electron microscope and the vector potential of the magnetic field RP1

J. B. LUPTON and ALBERT J. SAUBERMANN. A new and simple method for preparation of thin aminoplastic standards for X-ray microanalysis RP3

Part 2

A. E. ASHFORD, W. G. ALLAWAY, F. GUBLER, A. LENNON and J. SLEEGERS. Temperature control in Lowicryl K4M and glycol methacrylate during polymerization: is there a low-temperature embedding method? 107

G. POWLEY, J. KULICK and C. E. GALLERNEAULT. Automatic description of microstructures. I. A study of segmentation techniques for the localization of microstructural regions 127

C. E. GALLERNEAULT, J. KULICK and G. POWLEY. Automatic description of microstructures. II. Region classification using texture descriptors 137

C. E. GALLERNEAULT, J. KULICK and G. POWLEY. Automatic description of microstructures. III. Phase particle classification using shape descriptors 145

MARGARET S. BURNS and DAVID M. FILE. Quantitative microlocalization of diffusible ions in normal and galactose cataractous rat lens by secondary ion mass spectrometry 157
ALICE WARLEY. Elemental concentrations in isolated rat thymocytes prepared for cryofixation in the presence of different media 183
L. P. KOK, M. E. BOON, E. OUWERKERK-NOORDAM and P. O. GERRITS. The application of a microwave technique for the preparation of cell blocks from sputum 193
JUNE R. LAWTON. The use of malachite green during fixation of plant tissues for the preservation of lipids 201

Short Technical Notes
H. LÜNSDORF and E. SPIESS. A rapid method of preparing perforated supporting foils for the thin carbon films used in high resolution transmission electron microscopy 211
P. M. FREDERIK and W. M. BUSING. Cryo-transfer revised 215
J. C. M. J. DE GROOT. Selective contrast-enhancement of the cochlear duct glycocalyx after $OsO_4/K_4Ru(CN)_6$ post-fixation 223

Rapid Publication
R. J. ROSSER, R. FEDER, A. NG, F. ADAMS, M. CALDAROLO, P. CELLIERS, P. C. CHENG, L. DA SILVA, D. PARFENIUK and R. J. SPEER. Biological specimens imaged by soft X-ray contact microscopy using a plasma source produced with a laboratory sized laser RP5

Part 3

S. J. PENNYCOOK, S. D. BERGER and R. J. CULBERTSON. Elemental mapping with elastically scattered electrons 229
T. HANDELAND, E. ERKKILÄ and J. GJØNNES. A combined electron microscope and optical metallographic study of microstructures in high-strength, low alloy (HSLA) steels after welding 251
T. G. CUNNINGHAM, R. LL. DAVIES and S. C. GRAHAM. The application of X-ray microscopy in materials science 261
I. F. MACDONALD, P. KAUFMANN and F. A. L. DULLIEN. Quantitative image analysis of finite porous media. I. Development of genus and pore map software 277
I. F. MACDONALD, P. KAUFMANN and F. A. L. DULLIEN. Quantitative image analysis of finite porous media. II. Specific genus of cubic lattice models and Berea sandstone 297
M. E. CANTINO, L. E. WILKINSON, M. K. GODDARD and D. E. JOHNSON. Beam induced mass loss in high resolution biological microanalysis 317
J. C. RUSS, T. M. HARE, R. P. CHRISTENSEN, K. T. HARE and J. C. RUSS. SEM low magnification stereoscopic technique for mapping surface contours: application to measurement of volume differences in human teeth due to polishing 329

Short Technical Note
ALEXANDER R. CHANG. A simple photographic grid system for the correlative examination of cell smears by light and scanning electron microscopy 339

Book Reviews 345
